Abstract:

Online Library is most common need of this era as covid affected all over the world. Library are also closed. So, there is only way to study is online. But being online is always be like on the way of distraction. We always went online for something and doing other things. So, the idea of this project is Don't distract the students while they are studying it gives us only Books none of the other material. This application if simple and user friendly. It consists of four activates i.e., signup, login, user and read. User only have to sign in once in a while. After sign in User will get different books with their title. After clicking on Books, it will redirect to another activity i.e., read. The reading section gives us loaded PDF which we can zoom in or zoom out and read the Book.
